

SDP Bandwidth Attribute

Magnus Westerlund

Tomas Frankkila

Bo Burman

[draft-westerlund-mmusic-sdp-bw-attribute-00](#)

Background

Split out the SDP bandwidth attribute out of:

– [draft-westerlund-avtcore-multistream-and-simulcast-00](#)

› IPR Disclosure:

– [Telefonaktiebolaget LM Ericsson \(publ\)'s Statement about IPR related to draft-westerlund-mmusic-sdp-bw-attribute-00](#)

Goals with new Bandwidth Attribute

- Symmetric Bandwidth due to direction
- Support Upper Case Negotiation using Offer/Answer
- › Multiple Media Streams from an end-point
 - ›
 - Allowing to describe the aggregate
 - › Allowing to describe the individual media streams
 - › Describe the Type bandwidth information
 - burstiness
 - › Describe the burstiness of the source
- › Provide good extensibility for additional semantics

Are there Interest?

How many have read it?
Please provide feedback!

- › Are there Interest in the WG for developing a solution to the Issues Identified in the draft?
- › Please provide feedback!
