Update

- Version 00 and 01 contain two methods to do the Cbit re-negotiation, and issues remain:
  - For "Label Request" Method:
    - There is FEC update happened on PE2.
  - For "Label Release" Method:
    - Adding new error code, but lost backward compatibility.

- Update from version 01 to 02, to work out a new way:
  - Solve the FEC update issue, and have backward compatibility.

Control Word Re-Negotiation

Next steps

- Thanks for the valuable discussion from all authors and contributors.
